

Generative AI for Healthcare

Module 0
April 2024

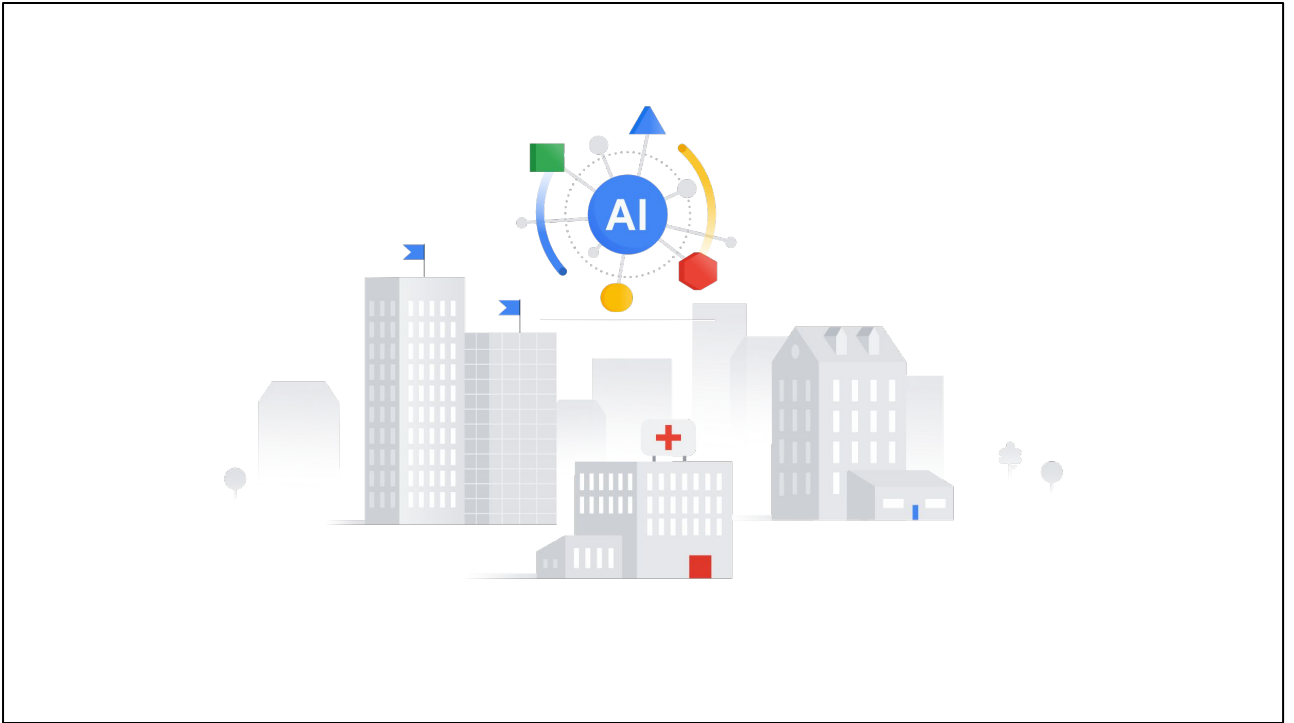

COURSE TITLE

V01

Course Introduction

The entire landscape of work and decision-making

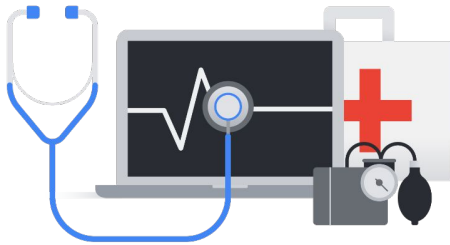

is being revolutionized by artificial intelligence,

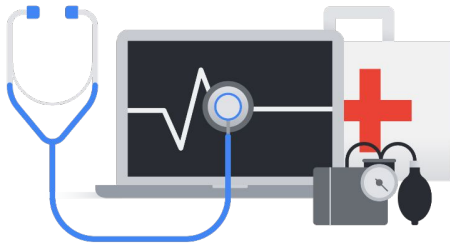

with generative AI, or Gen AI, at the forefront. This powerful technology has already transformed numerous industries, and healthcare is no exception.

Gen AI is changing the way we approach:

Gen AI is actively changing the way we approach

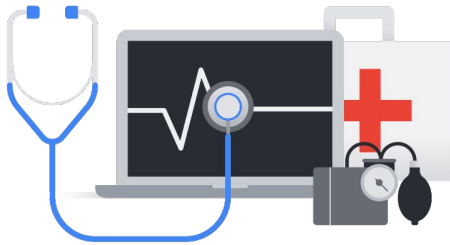

Gen AI is changing the way we approach:

Patient treatment

patient treatment,

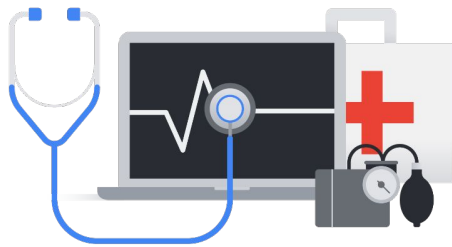

Gen AI is changing the way we approach:

✓ Patient treatment

✓ Medication

medication,

Gen AI is changing the way we approach:

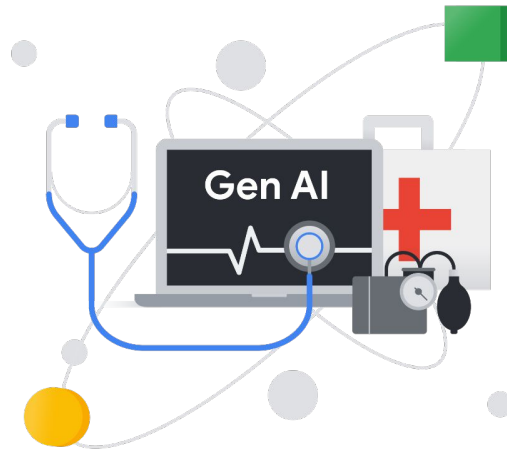

✓ Patient treatment

✓ Medication

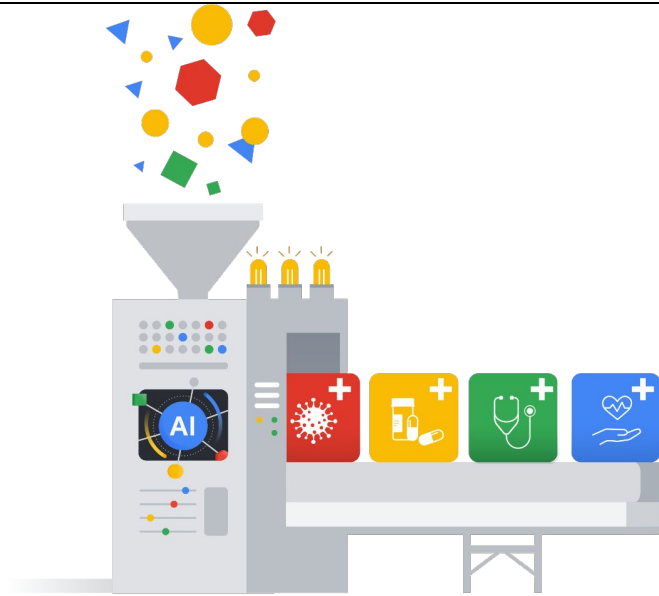

✓ Clinical efficiency

and clinical efficiency, leading to real-world improvements and potentially saving lives.

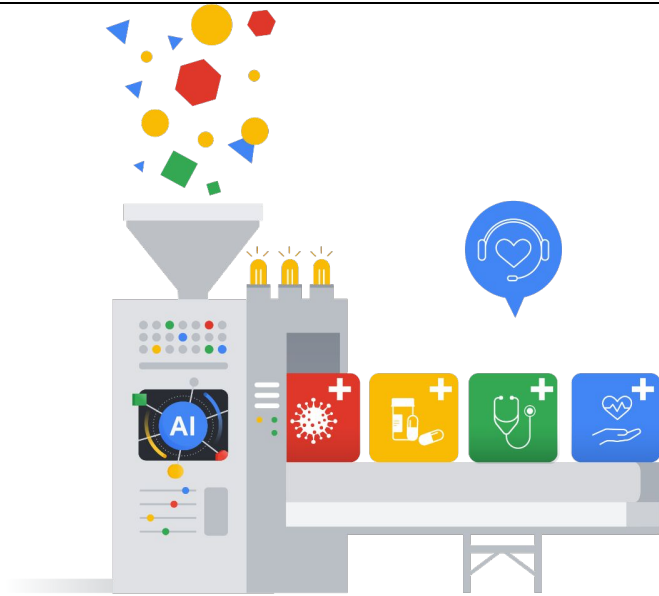

Gen AI for Healthcare

Welcome to the Gen AI for Healthcare course, where you'll explore the world of generative AI, specifically tailored to the healthcare sector.

Imagine AI models that can generate realistic medical summaries, assist with diagnosis,

or even create virtual assistants for patient support. The possibilities are vast.

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

Through a combination of videos, quizzes, and hands-on labs, you'll get an introduction to generative AI and large language models (LLMs), and learn how you can use these tools to transform the way you approach healthcare.

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

You'll learn to describe generative AI and large language models, and describe how they can be used in healthcare.

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

Other healthcare-specific topics this course covers include model tuning,

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

domain-specific foundation models,

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

multimodal large language models,

- 01 Introduction to Gen AI and LLMs
- 02 Describe how Gen AI and LLMs can be used in healthcare
- 03 Model tuning
- 04 Domain-specific foundation models
- 05 Multimodal large language models
- 06 Prompt design

and prompt design.
